☐ Transporter ☒ Other: Alleged dump site

PRIORITY ASSESSMENT: ☐ HIGH ☐ MEDIUM ☒ NO FURTHER REMEDIAL
ACTION PLANNED (NFRAP)

CLASS:

☐ I-STATE LEAD ☐ II-REM/FIT LEAD
State Accompanies

EPA Region 5 Records Ctr.

332240

State Comments:

The Thorton Drive site is the former residence of a Bloomington man who salvaged Westinghouse PCB capacitors from the Lemon Lane Landfill and the Dillman Rd. County Dump from 1963-1973. Copper and brass metals were cleaned and burned on site. The site is currently a vacant lot in a residential area served by the municipal water supply. There were no signs of capacitors or capacitor parts during site inspections conducted in 1988 and 1989. Because of the small number of people being served by groundwater in Bloomington and limited information about the site; it is classified as No Further Remedial Action Planned (NFRAP) at this time.

STATE INVOLVEMENT

☒ Preliminary Assessments ☐ Screening Site Inspection
☐ Listing Site Inspection ☒ Hazard Ranking System (HRS)
